Mark scheme

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Assessment Writer.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from aqa.org.uk

1b	**Graph 1**: EU immigration in the UK	E4	E1 for each valid improvement with a maximum of E2 for each graph
	Identify 'm' as millions or state what 'm' means		Ignore any additional but incorrect suggestions
	Reposition 'm'		
	Use grid/graph paper to enable more accurate readings		Not label the axes
	Extend the all curves to 2045/ same point		Not make lines distinct from each other
	Add a broken axis		Not define 'high' or 'low'
	Add a line for high net migration		Not make a bar chart
	The starting point for each line should be the same		
			SC1 (two errors identified but no suggestions for improvement)
	Graph 2: Brexit's impact on the pound		SC2 (three errors identified but no suggestions for improvement)
	Use a key		
	Indicate what 'NIESR' or 'OECD' stands for		eg. Don't know what 'm' stands for, line not extended to 2045 etc
	Use lines/points rather than bars		
	Switch or remove the higher and lower labels		
	Add more organisations		
	Add space between each column		
	Add (horizontal) grid lines		
	Make it clear which currency they are comparing with
