L3 Lead Examiner Report 1806

Level 3 National in 31463H Personal and Business Finance

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications website at http://qualifications.pearson.com/en/home.html for our BTEC qualifications.

Alternatively, you can get in touch with us using the details on our contact us page at http://qualifications.pearson.com/en/contact-us.html

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson. Their contact details can be found on this link:

http://qualifications.pearson.com/en/support/support-for-you/teachers.html

You can also use our online Ask the Expert service at https://www.edexcelonline.com You will need an Edexcel Online username and password to access this service.

Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your learners at: www.pearson.com/uk

Grade Boundaries

What is a grade boundary?

A grade boundary is where we set the level of achievement required to obtain a certain grade for the externally assessed unit. We set grade boundaries for each grade, at Distinction, Merit and Pass.

Setting grade boundaries

When we set grade boundaries, we look at the performance of every learner who took the external assessment. When we can see the full picture of performance, our experts are then able to decide where best to place the grade boundaries – this means that they decide what the lowest possible mark is for a particular grade.

When our experts set the grade boundaries, they make sure that learners receive grades which reflect their ability. Awarding grade boundaries is conducted to ensure learners achieve the grade they deserve to achieve, irrespective of variation in the external assessment.

Variations in external assessments

Each external assessment we set asks different questions and may assess different parts of the unit content outlined in the specification. It would be unfair to learners if we set the same grade boundaries for each assessment, because then it would not take accessibility into account.

Grade boundaries for this, and all other papers, are on the website via this link: http://qualifications.pearson.com/en/support/support-topics/results-certification/grade-boundaries.html

Introduction

This examiner report should be read in conjunction with the question paper and the published mark scheme. The report provides an insight into examples of responses that scored highly and responses that scored less. Centres could use this with learners in their teaching to ensure they understand how marks are gained.

This was the third sitting of 31463H Personal and Business Finance. The paper was of a similar nature to June 2017 in terms of its layout. The paper consists of two sections. The first section (Section A) focuses on personal finance and consists of both short and longer answer questions and is worth a total of 36 marks. The second section (section B) is based around finances for businesses and is worth a total 64 marks.

Introduction to the Overall Performance of the Unit

It was particularly pleasing to see a higher standard of some of the extended written answers. Learners frequently demonstrated good subject knowledge and showed improved skills of analysis. To improve performance further a number of learners would still benefit from providing more balance in their responses. This is particularly important on the extended written answers. Giving justified conclusions where these were required (questions 6 & 14) would also help improve the quality of response. This was also the case in the last window. Learners who scored higher marks in the longer questions demonstrated not only good knowledge and understanding of the content being addressed but also the ability to apply their knowledge and understanding to the context provided. As mentioned for both the previous series paper this is a fundamental requirement in being able to allocate the higher levels in the extended writing questions, i.e. those questions starting with the command verbs discuss, analyse, assess and evaluate.

Numerically learners will benefit from showing labelled workings to allow the examiner to follow their train of thought. This would enable marks to be awarded for process which will help learners achieve a better grade.

Learners will continue to benefit from practicing their skills and to apply their knowledge and understanding to a broad range of contexts before taking the assessment. Centres should consider carefully how they plan their curriculum to ensure that learners have had sufficient time to practice and prepare before taking the exam. There was a noticeable difference in performance of students who have been studying the qualification for longer than those who have been registered more recently.

Individual Questions

Section A Personal Finance

Q1 This question was well answered with most learners gaining full marks. Where earners provided examples of two different banks this was rewarded with one mark for the work bank in their answer (e.g. Barclays Bank, Nat West Bank would receive 1 mark).						
n the example below two marks awarded for correct answers as per the mark scheme. 1 Give two different types of financial institution.	,					
1 Bank						
	1.00 \$7961 2000					
2 Pension Company	politic North					
2 P2()3(0) COMPONY						
n the next example shown below zero marks awarded as an incorrect answer vas provided.						
1 Give two different types of financial institution.						
Fos - Financial ombundsman Service	**4**					
2 FCA - Financial Conduct Authority						

Q2

This question was less well answered with a number of learners providing oneword answers or incorrectly identifying what the FCA does. Some learners said they gave advice on the best product to choose which is incorrect.

Two marks were awarded on the example below. Both are rewardable responses.

2 State two ways the Financial Conduct Authority (FCA) can protect consumers in relation to personal finance.							
1	lake sure if a person is being						
	rauded and help them out.						
2	to keep businesses in check						
	marks were awarded in the example shown below. Neither of the two nples are correct. Itate two ways the Financial Conduct Authority (FCA) can protect consumers in elation to personal finance.						
1.	Offer financial advise to consumers						

2 .	Insurance Service						

Q3

This question proved to be a good differentiator with a good range of marks awarded. The stronger learners could identify both the advantages and disadvantages correctly. A number of learners incorrectly stated that direct debits always occur on the same day for the same amount but this is not technically correct as the third party can take funds as and when required to service the account.

In the example below.

3a Two marks awarded.

3b Two marks awarded.

In the disadvantages the word card was taken to mean bank card / account to give the learner the benefit of the doubt. The disadvantage which was rewarded in this example was that it could lead to an overdraft.

3 (a) Give two advantages to the consumer of paying monthly bills by direct debit.
(2)
1 It goes smaight out the account
so they don't miss a payment.
2 Quick and efficient doesn't require
travelling or time consuming.
(b) Give two disadvantages to the consumer of paying monthly bills by direct debit.
(2)
1 If they have no morey in their
card it could lead to an averdraft.
2 Also, sometimes is an error has
can be hime consuming-
can be time consuming-

In the next example shown next the following marks were awarded. 3a One marks awarded (automatically comes out of your account). 3b No marks were awarded.

1 The money automatically comes out of your account at the end of the month so you can't get the price amount wrong aloue.

2 The consumer account have to the chance to get the amount All the bus come word, as the automatically town out digitally out of the some two each month.

(b) Give two disadvantages to the consumer of paying monthly bills by direct debit.

(2)

1 If the consumer doesn't have the money in their account then the buls cannot be paid which will mean you owe money.

2 The different All of the buls come out at you can't always get one money is mey don't have the money in their bull can't always get one money is mey don't have the money in their bank.

Q4

This question produced some very interesting responses which were sometimes a little stereotypical. Some candidates did not apply to the situation that people in old age might be in and gave generic answers about the benefits and drawbacks of borrowing and saving which lost the learners marks.

In the example below six marks were awarded placing it at the very top of band three. The learner demonstrates a thorough understanding of relevant information and produces a well-developed, balanced discussion.

4 Discuss the personal attitudes of people in old age towards borrowing and saving . (6)
People in old age may mant to keep as much of their sawings as possine due to it being one of the only incomes they may have and this means that they can have money for any unexpected events like healthcare or for their family in the future
People in old age may not borrow morey from financial institutes as they men not be able to puy it back as they do not Work Care in retirement and do not get a Stable, regular income. So they would have a massive debt they couldn't appoid.
People in ad age may downsize their expenditure like their othistes and food it possible to allow their source of income like pension possible. They may even more to a smaller house to reduce coss.

In the following example zero marks awarded. This response does not answer the question but gives some generic benefits and drawbacks of borrowing and saving as mentioned earlier. These could therefore not be rewarded as they do not answer the question.

Personal attitudes towards the role of money will differ according to the individual's life stage.

4 Discuss the personal attitudes of people in old age towards borrowing and saving. (6)The achievemency of bonco-ensy so theat it allows you to have instant money. This mounting That is you souron money from the bunch you was recome the money throught avery. theorer advantage is treet you can borrow however hough you need. This mooning Their you only borrow what is suitable for your. where you can therfore pay back. A disabilitye to borrowing is that you will be Courty of Interest on the money you borrow. Und Memory that There may be additional fact to Wan you borrow warry. Mother discoverentials is thent it you comment they beack up the you Man reasone for and pevelhas. This warning that There will be on top of what you barroned any late proposed there was be additional less. The advantage of Suntry is treat you wins receive interest on the excovery thank you sure. This transmy that every waster / year you will Verneura extra money for the money that you

put who the Sovergo.

Mother advantage is that it is very
Secure This mouning that if you was
to Some with one ISA then your money
will be take there's no rush of your loding
trat morey.
However me disadventuge of you survey
money 5 mark 16 you red money Lov
any emergency it may be bound to accome
the movey and some sources you have
to gue a notre.
T
Mother discoluentings to Survey is that right
you wheest rules are low. This monning
that the return you will receive for the
Money you sure were not be that high.
as the union rate non is 0.5%.

Q5

This question provided a wide range of responses. Stronger learners could identify the benefits and drawbacks of using an Independent Financial Advisor. They could also draw good comparisons with other providers of advice which was then well rewarded. Weaker responses were one sided and lacked the depth needed in their argument to achieve the higher mark bands.

In the next example eight marks were awarded. This was a well balance answer with good development and as conclusion which perhaps could have summarized a little better which would have helped it achieve higher in mark band three rather than being at the bottom of the level.

5	Assess whether Morna should use an Independent Financial Advisor as a source of financial advice.
	(10)
	If Norna goes to an Independent Financial
	Advisor to get her financial advise, she
	could be at risk of reading biased
	financial information, as IFA: 2 don't
	always give clients the best option for them,
	rather the best option to that I benefit
	their company. This could potentiany
	lead to her getting paise financial
	information regarding her position, and as
	a result could potentially risk doing
	Something to negitively impact her
	andit scove, or even place her in
	unmanagebre debt sometime in the future
,,	Independent Firancial Admisors also cost money
	and as she only has a small amount
	of savings, There's a change that the
	extrac couldn't afford that assistance in
	The first place and will potentially
	need a loan or an overdraft to even

be able to pay to review their services prime ser to use of her caring paying for their potentially brased assistence, and be left with no money, which round be pay as the wooded how someth as emordanced final as she does not have any life instance Besides the potential of bias, Independent Knancial Advisor are good for their mo and could get her into a safer position with their advice. She will definately benefit from some verneuing her francial stration as she only has minimal consider of some pension and a standard bank account. There's a chance the could Se better of with getting a Promum bank account her starting her an pension for as and getting use insurance Although his may decrease her raings, it could work and better for her in the long on as she will have more insenties from her Premium account that she can benefit from. A Enginer interest pate on her surings from the premium account we also help.

Norma could also isit has bank for adulted on her financial products, as they can suggest to her what to do with how suings and her bank acrown for free.

In conclusion, Norma can definately benefit from reaching out to an independent financial aduisor to helpler asses her financial products as she any has the efondard version of eventaing she does and could do with some valuable and professional advise.

In the next example for two marks awarded placing it in mark band 1. There are two points which are of credit although we should be mindful that the number of points made does not mean a learner achieves this many marks. The first is that "it will cost her money" and the second is that "she doesn't need it at the moment but may do in the future if she makes a large purchase". This answer has major gaps in knowledge and lacks development.

Morna's money stability is good as she has
a full-time job' which means she has a
stable income. She also has a 'standard
bank account which shows the bank
trust her an she doesn't have a poor
credit score Moma also has a savings
account which although this is small
it shows she is planning for the future and
has a positive attitude 600 tawards money
Moma also has a mortgage which shows
she has a good credit some and she is
compounted as this can be repaid
over . 25 years which is a long time.
Another advantage Mana has with the
way she see's money is the fact that
she has a basic work-place pension
which tells me that she has a lot of
consideration for the juture.
By using a independent jurancial

adviser this would oost her money which if she is considerate about her money the this would mean she may not want to use this as a source of financial advice. The factors of her financial state at the minute mean she may not need advice as it seems she is hardling her money situation well However y a brige purchase such as a new house or a new car she may want to consider using the adivisor as the lost thing Morna wants to do is end up in debt as struggling to pay for her hase as current things one owns.

Q6

This question proved to be well answered by many learners with a good spread of marks achieved. Questions of a similar structure have been asked in previous series and it appears that learners were much better prepared for the question as a result.

12 marks were awarded for this answer below which places it at the very top of mark band 4. This was an excellent answer which covers all the products on offer and discussed them in detail and comes up with a strong justification for the decision made.

(12)

Firstly, blestshire Back has the lowest around east at \$120 which weems I would be paying the seeks a second compared to The Royal Bank which borne a \$7.2 higher around see which so be hard to warge at times.

180 persong to Flexyshire account with Westshire Bank will give the Liam and his samily was a towed to surround the second will be ideal for the paying the second will be suitable for time and his samily in Europe which will be ideal for the paying the second will be suitable for time and

Both Lian and his potose both secretly proclased

the Lateral I Phone without assurance which because it

so his a good mobile phone insurance. Choosing the

Flagphus account will allow Lan to use up to \$1000

to his phose which is peally good soo him but thus

will only construct a phone and his partition.

As him is a phone with the flagphus account

is not the most sindable account to the flagphus account

will have to pray interest soo the rest \$200 per month.

Looking at Ashboidge Ban's Ultimate Remote account, the annual gees are at 40 higher than the Elexalus account which is not a lot higher but I ion will have up to \$300 interest see madrage which will be ideal so him as he is roughly overdown by around \$300 yet month, therefore he will not have to pay Fastered nother many he is taking out which my same him many certine they getting their Liam's somily will also recience which is not as releast as his family usually stays eithin Europe but in case of gaing outside of Europe, his senily will be insured which is a good thing best they will not make the most out of this insurance. Moving onto Shimale Bank's Travel Plus Pack's exent this will be the ideal account which Liani goes for as it estitles him Samily to Europe Samily and winter sports inscreame which they will make the most of as try go on a holiday trace a year which idealy will be in survey summer and writer and they will be The have access to both Europe and winter sports traced baseroone mass of an analysing The actual anual cost of the account is relatively. high compared to both Flespolis and Ultimate Remode but the benegite I iam and his family reciese are north the high price. There is also come makible phone cover for both Lians and his portose which were they will not have to many about about saming their phones as much as they are both covered Lastly Have is \$200 intenst see andost and label which mans I iam will have to pay agent interest on any money which is overdown over \$200 but he can make some small change in ode to reduce the amount be has to - pay interest on by reducing notes wange and the Lastly the Select Presidence account will has some positive and regalise things much as I see adjust interest free overlogt which will be telepful for bion but there a dre worldwide measure which his Sanily i'll not make the most out of. Overall, The Ford Plus Pack" will be the ideal account which I can should go for, as he will have access to be 2 insurences who as boliday is the - unter (within Furge) and liam and his portrer with both have mobile stop inservance which is relevant to his situation as they have recently surchased very expensive phones which break easily and be I also to the base \$ 200 interest just as better change the account.

In the next example five marks awarded placing it in mark band 2. The learner presents numerous points demonstrating some linkage between the points made. This helped to support a judgement they present at the start of the response. However, there are too many omissions in this response which prevent it from moving to a higher band.

6 Evaluate which packaged current account would be the most suitable for Liam. (12)
I would think that Ashridge bank is the
most Suitable for lam. This is because it
meets his requirements. The reason why I have
picked Ashridge bank is because there is a
2300 interest-free overdraft This would mean
he wouldn't have to pay interest if he is overdrawn.
After calculating how much it would cost if
he is overdrawn ever once every munth he
would have to pay an interest rate of atleast
5%. This would mean that he would have
to pay \$180 extra for overdraft interest this would note out rule all the annual costs of the
financial organisations. This means he will be
Spending more overall. All the other organisations
do not have the same overdraft limit, as Ashridge.
12 months in a year as he is regularly overdrawn \$300.
5% OF ±300 = 15 ⇒ 15×12=180
Another factor that interested me in Ashridge
bank is that the two liam would get a
worldwide family insurance This would cover
the interested locations that Liam is
interested in. Since most of the other banks

did not cover cover Europe and the U.K. I was honestly torn between the Ashridge bank and the rogal bank, because the insurance This would mean that it would cover both Iphones if lost or Stolen, and any other times that could break around the house for example the T.V. The reason I wanted to choose the Royal Bank is because Ashridge Bank did not cover Liam's partners phone and only covers Liam's phone. This could be an expensive replacement for Liam's partner because the latest I phones costs \$800-\$700. This is not a major issue as because all Iphones have tracking software (find my Iphone). This even if it was stoken But replacement parts can be expensive such as \$100 for a new screen. This is not as much as Liam would pay for his overdraft of \$180, if he didnot pick ash penalty, if he didnot pick Ashridge Bank.

Q7 This question was well answered with most learners being able to achieve full marks.
In the next example one mark was awarded for the idea of measuring the value of the business (balance sheet / statement of financial position)
7 Give one reason for recording financial transactions.
To calculate plan worm
In the second example zero marks were awarded. This would not be a reason for recording the transaction (this invoice could prove ownership without it being recorded).
7 Give one reason for recording financial transactions.
Too prove that he owns the assets
Q8
This question gave a range of answers and marks proving an effective differentiator. It was clear that many leaners understand the concept of variable costs and gave correct answers. Given the limited scenario at this point several answers were accepted as, depending on what the business does, they could be construed as variable costs so the benefit of the doubt was given to learners.
For the next example two marks were awarded on the basis that travelling to clients would cost proportionally more and grooming products would vary depending on the number of clients. 8 Identify two variable costs that a business such as Pet Boutique could have.
1 Grooming products
2 Petro Fijel For van
For the next example zero marks were awarded as this were incorrect responses. 8 Identify two variable costs that a business such as Pet Boutique could have.
1 one variable cost could be equiptment
2 Another variousce cost ceved be 10ans.

Q9a

Many learners gained full marks which was pleasing. Learners showed the formula and were rewarded with a mark where they made a calculation error. Rounding errors (down instead of up) were quite common and lessons should be learned on this.

In the next example two marks awarded for correct response. Either the 72.15% or 72% would have gained two marks.

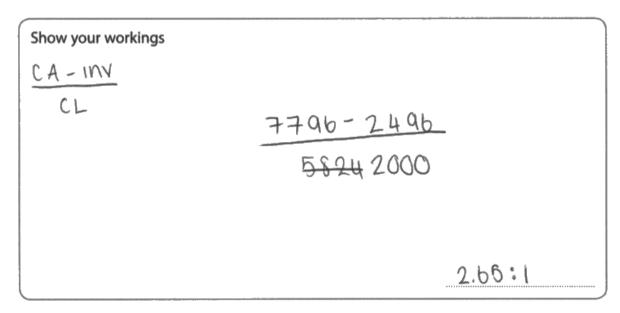

The next example is worth one mark awarded for the correct formula. The answer has been incorrectly rounded down to highlight the point made earlier.

Q9b

This question proved challenging for some learners. A lack of knowledge was demonstrated by some learners who provided the current ratio formula and calculation instead. Reading the question carefully would help to avoid this occurring.

In this example two marks were awarded for the correct answer. Had the learner miscalculated they could still have gained a formula mark so this answer demonstrates good practice.

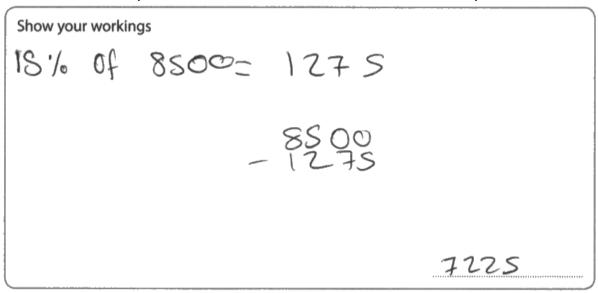

In this example one mark was awarded for using the correct formula.

Q9c(i)

For this question learners were asked to calculate the new net book value of an asset. This should have proved straightforward and many learners gained full marks. Learners should try to label workings clearly so that, if a mistake is made some of the answer may still prove creditworthy. It should be noted that in the specification the straight-line method chosen to be used is X% of cost rather than (cost – residual value)/ number of years. Although this is a recognized method of calculating the depreciation since it is not in the specification it will not be tested. Residual value with therefore not be given to avoid any confusion.

For the next example two marks were awarded for a correct response.

In the next example one mark was awarded for correctly showing the formula in numbers. Miscalculating the figure was not uncommon so checking your answer is recommended.

Show your workings
$$8500 \times 0.15$$

$$= 1275$$

$$8500 - 1275 = 7725$$

$$7725$$

Q9c(ii)

Many learners found this question a little challenging. The common mistake was to deduct £800 from the current assets but then neglect to add £800 to the current liabilities. This frequently lost marks.

In the example below three marks were awarded for the correct response. The learner has also labelled the figures which helps when awarding any OF marks when the final answer is incorrect.

In the next example two marks were awarded. One mark was for correct formula in words and one mark for correctly calculating the new current asset figure.

Show your workings current - current - Net current assets - liabilities - assets / liabilities - assets / liabilities =
$$\frac{3,000 - 800 = 2,200 - bank}{2,496 + 2,100 + 2,200 + 200}$$

$$= 6,996 - current assets.$$

$$6,996 - 5,824 = 1,172$$

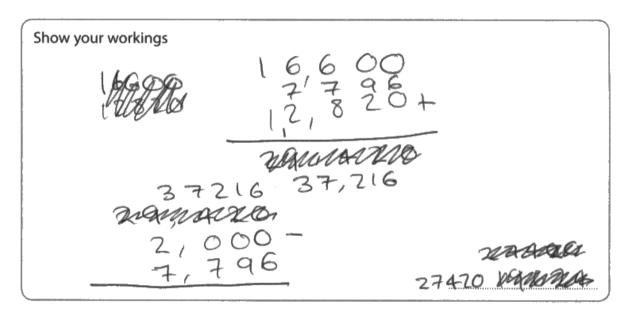

$$= 1,172$$

Q9c(iii)

There were several ways of calculating the new net assets figure. A common mistake was not to consider some of the errors and only do the last one. This was exacerbated by poor workings which had numbers not clearly labelled and lost marks for the learner as a result.

In the example below one mark was awarded. This was for the formula shown in words.

In the next example no marks were awarded. None of the figures are labelled and are not as per the mark scheme.

Q9d

As with the last question 9c(iii) learners did not use all the information to calculate the new net profit. The direct of some of the changes to profit was often incorrect (the accrued expense was added to profit for example) which cost learners marks.

In the following two examples no marks awarded.

Show your workings
The new net profit
win be
15772-1280=14492

£14492

Show your workings

13702+1280=14982

£1498Z

Q10a

This question was well received by learners with a wide range of marks being awarded but the most common being the full eight marks. Where learners lost marks, common mistakes were to label the total inflows poorly and put the wrong direction in some figures (i.e. showing some figures as a negative rather than a positive and vice versa).

In the response below eight marks were awarded. All responses are correct.

	January	February	March	April	
	£	£	£	£	
Income					
Sales	2 700	950	3 650	2 940	
Other income	200	(iii) 200	0	0	
(1) TOTAL INCOME	2 900	1 150	3 650	2 940	
Expenses

Closing balance	1 558	246	1 801	(viii) 246	(1

Q10b

This question was based around calculating the break-even quantity. A pleasing number of learners scored full marks. Equally many learners were unable to calculate the selling price per unit by dividing the expected revenue by the number of units to give the answer £18. A similar problem occurred with calculating the variable cost per unit. Marks were also lost for writing the formula with contribution rather than contribution per unit. This cost some learners some marks.

In the next example four marks were awarded as the response is correct.

In the next example two marks were awarded. One mark was given for the formula and the second for calculating the correct selling price per unit.

Show your workings

BE = fixed costs

Contribute per unit

FC = 5640

CPM = 5P - Veper unit

$$17460 = 1.5$$
 $3640 = 341.31$
 $18 = 1.5 = 16.5$

Q11

The next question was about break-even which is a question which sometimes proves tricky for learners to explain. Marks were well spread with a wide range being awarded. Learners often do not talk about break being used as a predictive tool and frequently used past tense when discussing it.

In the example below five marks awarded placing it in the bottom of band 3. The response displays a balanced discussion. However only some of the points are developed which prevented full marks being awarded.

11 Discuss the advantages and disadvantages to a small business of using break-even analysis.

(6)

An advantage of using the break even analysis is that it lets a business throw how many sales they have tomake in order to start making enough which would inform a business ormer unhether likely need to increase sales or potentially increase sale prices so that they can etill make a prosit on their current holes' sale signers. Another advantage is that it could help a business to blood both predict if they are holling going to make a prosit in the subure.

A disadvantage is that a break even analysis can take time to create limborate therefore costs money which a business may not be able to assorb. A surpher disadvantage is that a breakern analysis only shows the prositability of one product or service and also doesn't take into account discounts a business may give to customers.

In the next response three marks were awarded placing it at the bottom of Level 2. The response is balance but not developed sufficiently to reach the top of Level 2.

Discuss the advantages and disadvantages to a small business or using break-even
analysis. (6)
A benest or break even is that it can
inform pricing decisions, which means that
Since Tomasz is unexperienced he will beneat
from the have a setter understanding to how high
or how low he should put his prices ALLY both with
where even you are alone to set forgets see you set your
targets when union visu motorate his employed
to work more efficiently, however, though the
target is know, if it is set too high, this may stress
out the norms from acheining this goal
A disadvantage of break even is that it assumes
all prices are fixed union means treat
Tomasz may change his costs by increasing trom
or decreasing.
Break even amons Tomasz to monitor he busicos
performance which as a small souries. Le mas things
It's performing new but is actually not this is why
with breme even, Tomasz will be over to see it wo
busines to moving a print or loss.

Q12

Leasing proved to be a topic which some learners understood and produced good answers but others struggled to show understanding of what it entails. Common mistakes made was to mix leasing up with hire purchase or thing that the company does not own the asset. A minority of learners may have misread the question and took the view that the company was leasing its vehicles out to other business. This demonstrates that reading the question is important to avoid these issues.

In the next response a full eight marks awarded. This response fully meets the L3 descriptor.

12 Analyse the advantages and disadvantages to a small business such as <i>Pet Boutique</i> of leasing a vehicle.	
	(8)
One adautoge grassessing is that it heeps with budgeting	As he
would be passing for the velicle wouthly, it would velp a	
organise his cash from, especially with the fact that he	
a regarine not flow in most months, this makes it better	
Leave, there parsing a wing our, which could significantly a	Heck
his cook flow postloan	
enting	****C
As a veride is they be to realidown it may have night of	
and maintenance costs. There can be expensive, and to be	
helps Pet Boutique to anoid any of these costs, this can help	tue
cook from, and reduce depended, within in them, herps to a	
lossin prefys.	
However, a regular to this is that the areal amount par	d. for be
leave, can be higher than premaring extright. This w	
that area a geried of time, he may have speet more	
it when he could have bought it instead.	
The other trespect is quest be never a chiraly owns	λ.
This may not be good to it he made to use the nation	4.5
a regular basis, where it would be more beneficial it	he just

any it there exists he relieve began and becoming and becoming and becoming absorber. This was wear he wonan't was wrong, as he works weed to sell therefore the face that he never owns the velicus can be look good and band.

For the next example four marks were awarded placing it at the bottom of level 2. The advantages and disadvantages of leasing are present. However, there are clear omissions of knowledge shown in the answer. There is correct application to a small business.

12 Analyse the advantages and disadvantages to a small business such as Pet Boutique of leasing a vehicle.
(8)
leasing a weith vehicle the is where
the lessee purs a deposit down of
a certain amount and all pays in
wonthly instalments with the
Option to pay the optional payment or
neturn the vect vehicle.
An adventage or the this is that the
the monthly instalments that you pay
allows flexibility to the practical owner
Therefore making budgeting a be easier
for the Bb business which will help
notes improve cash flow potentially due
to the fact it is spead out and
to doesn't affect their Pet Bowliques
disposable income as the much, considering
they're a small business.
·
to A disadventage of leaving is that
if they Pet Boutique fail to keep up
with represents, the asset can get
seized an from you and a fine
would also be imposed which will
- rain
terrage your cash flow and their west
Score rating will reduce over a period
of fine.
1

Q13

The next question was the impact that introducing a payment plan would have on liquidity. Many learners spoke of how it would benefit the business but did not make clear links to the impact on the business liquidity and discussed its profitability. As a results marks for many learners were slightly lower than they might have hoped for.

In the next example six marks were awarded placing it in mark band 2. Some points were made but the development (at times) do not make explicit links to cash flow / liquidity which impacted on marks awarded. A lack of judgement/conclusion prevents it achieving Level 3.

13 Assess whether introducing annual payment plans would help improve Tomasz's cash flow.

(10)

I strollicity arrival payment planscould help with Tomasc's casherow problems as he'd he able to see when her is expecting ancome and mound also have a regular income soon his customers tather than howing a varying amount each month. Introducing omical payment plans may Debay make Thylosogram more customers for Tomasz as he'dbe dissevent from other set groomers in the area and customers may present this method OF Daying. A rother advantage is that Tomasz could budget more Successfully as he wanted would know when his next income is and sould set up any rigular payments to conciderath his regular income Sahe is not overdrawn A disadvantage is that the payments are morked out soom the previous year so are tilline with usuation or any new costlution MASH may arise. A surther disadvantage is that cultimers may preser the normal method of payment the huce why no other groomer is the area orsers this facility so Tomase may lose customers therefore may sail to break even and could ger into debt or become overdrains

For the next example four marks awarded. There are two partially developed points which are linked to cash flow. This learner therefore achieved the bottom of Level 2.

13 Assess whether introducing annual payment plans would help improve Iomasz's cash flow.
(10)
It cause belo emprone Tomasz's cash flew
as no over granner in me area afters
this type of payment than / facility so he
win instantly be the go to forcustomes that
like paying his way and transfore increase
Sales and chances of customer board layer
Also, having the same set amount soon
month/ personum conneito his business.
Townsz cun mala a more accurate
cash flow as he will have efficient and
accurate direct delate routher than
- Avarating areait sales or BACS payments.
Disiding his oustonnes payment enally
is ne same reactions amount every
Markin a good way to make cashdlew
Productivity as the number are easier
to work with and direct debits are
easier 6 pay,

Q14

The final question gave a scenario for learners to decide which would be the best course of option for the business to choose. Where learners gave an answer in detail it was often of good quality which discussed the benefits of each and came up with a justified conclusion as to the best option to choose. These answers were well rewarded. A number of learners did not have enough time or did not understand the question as it was left blank. Learners should try to ensure that they spend their time more evenly in order to complete the full paper.

In the next example the full 12 marks were awarded. The answer had balance and depth and a fully justified conclusion. This answer met all of the Level 4 descriptors and was therefore placed at the top of mark band 4.

Luill be Shoring his Store with another grooner who could potentially to be Tamasz's customers and it Tomosz was to fire him Eustoness will not be happy. However, lamasz will be making 14% of the revenue of the Other grooner plus the space for rent pluse the Morey he is making him self which means that he will be making him self which means that he will be making him the fature. However, Tamasz's overhead cost will increase from 17.180 to 18.865 and his fixtures and Fittings will increase from 9140 to 10.511 which means that he will be paying \$3086 yearly extra but he will be making that the air be proposed to an that from the other day grooner so it should not be a big problem for him.

If lands 2 was to go with aption 2 sten to will be althoughing more assembly who are only interested in pet food wo may oren become interested in day growning after entering his Store which will up his sale and his wholey customes that grown their days will start purchasing meday food from him which will up his Sales even more However, he will have be pay \$2000 to purchase the display equipment which will

lose him some money but it this idea becomes Successful than te will be making much More. He has planned that if he does do this then he will be Sold out in about 3 Months (92 days) Which 13 Good because in a year te will sell through all Of his Stock Utimes which will highly increase the amount of revenue be is making. Havever, Tomasz man have be blink about Binding an employe to help him sell the dog food and accessories as It may because difficult for him to grown the dogs and Sell the Stock at the to Same time. So this means that te will also be loosing Some money as he will have be pay the employee his Salories. Overall I would recommend Tomasz & go with Option 1 as there business will stort to gran because More people will start going as they Job will get dose quicker and be will be making extra more, of tent and money of the other day gioomer-Also Tomasz will not have to pay any exten morey to p Set anything up or have be buy stock like he would with option B except for howing to pay were for overhead costs and fixtures and F. Hings, But that is yearly and not even byat much more than what he was paying Bearlies.

For the final example six marks awarded. Some points are developed, for example the need for a loan/trade credit but there are a few omissions. The conclusion lacks support and not all judgements are supported.

14 Evaluate which option would be the most profitable for Pet Boutique.

·
Option one may cause more problems with
tomass and his assumers ternoss may see
a decrease un his customers are to a new
pet groomer in one some store. Therefore, he
may not be in a good hearthy revolunship to
are new day groomer. However, tomas may
have large constance once may not go essenthere.
However, on increase in overhead ast cha a
faster depreciation of pixtures and fittings may
decrease the network value of his business, even
though he will recieve thoo rent he may see a
significant observes in his arred value

Summary

Overall there are some clear examples of excellent practice taking place in centres. Some strong examples of personal finance understanding were pleasing as a noted improvement in the structure of the longer written answers with more evaluation taking place which built on the improvement noted in the last series. Some candidates spent too long on section A and, whilst they may have scored well this was sometimes to the detriment of section B with some learners running out of time as a result which seemed apparent on Q14. The following suggestions are made on how learners can further improve their answers.

- Ensure the question is read carefully to answer the question asked.
- Ensure the amount of time is spread across the paper so all questions are completed.
- Always show the formula and workings in the calculation questions.
 Workings should be labelled so the examiner can see the thought process behind the answer.
- Where there is more than one mark available knowledge points should be developed further rather than giving isolated points of knowledge.
- Aim to produce a balanced argument on all questions of 6 marks and above in order to achieve the higher levels.
- Where there are two or more elements to consider always try to give the positive and negatives point for each rather than just repeating the content or saying "x is better than y".
- Use the scenario provided to apply knowledge and understanding in context. If numbers are provided, this is a good opportunity to use these in answers to support the arguments being presented. If relevant, do some calculations to help you to give good context.
- Provide a conclusion to the extended written answer questions that is justified based on the arguments presented in the body of the response.
