

Homework 8B – Solutions

1(a)

M1

Network diagram
(see appendix for activity on arc)

(b)

A2

3

-1 for each independent error (max -2)

(c)

M1

2

Forward pass, correct at G
All correct

(d)

A E G H J

B1

1

(e)

M1
A1
A1

3

SCA, 8+ activities
Use of float(s)
All correct

11

Total

11

2)

Less time consuming

B1

Accept also

- cheaper
- simpler to conduct/ easier
- less data to handle

Additional Guidance

A census would give too much data (to process)

B1

Uses less resources

B1

(a)

Unbiased

B0

More accurate/ reliable

B0

A census only happens every 10 years

B0

A sample can be done any time

B0

You can get more specific data

B0

If they used a census, some staff may have joined or left

B0

A census includes everyone/ With a survey you ask a few people
[these are just definitions]

B0

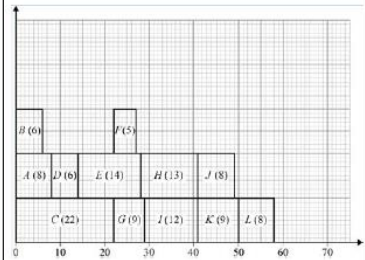

Homework 8B – Solutions

TOTAL: 44

①

2)	A list of (all) staff at the company	B1	oe e.g. telephone directory of staff at the company, database/spreadsheet of staff, register of staff
Additional Guidance			
(b)	Any reference to types of sampling method (random, stratified, systematic)	B0	
	Any reference to the number of people to be sampled	B0	
	All staff [this is the population – the answer should refer to a list]	B0	
	236 + 249 + 383 + 492 + 75 + 65 or 1500	M1	Allow one error or omission
	$\frac{383}{\text{their } 1500} \times 160$ or $40(.85\dots)$	M1 dep	Dependent on previous M mark
(c)	41	A1	SC2 for 40 seen on answer line with no wrong working

⑤

3) a)	<table border="1"> <thead> <tr> <th>Activity</th> <th>Early</th> <th>Late</th> </tr> </thead> <tbody> <tr><td>A</td><td>0</td><td>9</td></tr> <tr><td>B</td><td>0</td><td>9</td></tr> <tr><td>C</td><td>0</td><td>22</td></tr> <tr><td>D</td><td>8</td><td>15</td></tr> <tr><td>E</td><td>14</td><td>29</td></tr> <tr><td>F</td><td>22</td><td>29</td></tr> <tr><td>G</td><td>22</td><td>29</td></tr> <tr><td>H</td><td>28</td><td>42</td></tr> <tr><td>I</td><td>29</td><td>41</td></tr> <tr><td>J</td><td>41</td><td>50</td></tr> <tr><td>K</td><td>41</td><td>50</td></tr> <tr><td>L</td><td>50</td><td>58</td></tr> </tbody> </table>	Activity	Early	Late	A	0	9	B	0	9	C	0	22	D	8	15	E	14	29	F	22	29	G	22	29	H	28	42	I	29	41	J	41	50	K	41	50	L	50	58	M1	Early times correct at E, F, H and I
Activity	Early	Late																																								
A	0	9																																								
B	0	9																																								
C	0	22																																								
D	8	15																																								
E	14	29																																								
F	22	29																																								
G	22	29																																								
H	28	42																																								
I	29	41																																								
J	41	50																																								
K	41	50																																								
L	50	58																																								
		A1	All correct																																							
		M1	Late times correct at I, H, F and E fit their answer to part (a)																																							
		A1	All correct																																							
		4																																								
b(i)	CGIKL	B1	1																																							
(ii)	2	B1	1																																							
(c)		M1	SCA, resource histogram, at least 10 labelled activities shown, condone floats.																																							
		A1	Two 'complete' horizontal rows, but no 'vertical gaps', showing correct progression, correct start times, (condone floats).																																							
		A1	All correct. (no floats) oe																																							
		3																																								

⑨

4)	(a) =SUM(B2:B9)	B1	1		
5)	2(a)	Discrete	B1	1	
	(b)(i)	The mean is affected by the one very large value, 18	B1	1	oe
	(b)(ii)	The mode is the smallest value	B1	1	oe
	2(c)	$\frac{3}{15} (\times 100)$	M1	2	oe
		20 (%)	A1		
	2(d)	$\frac{10}{15}$	M1	2	
		$\frac{2}{3}$	A1		
		Total		7	

⑦

6)	(a)	$£ 2000 \times 1.035^3$ $= £ 2217.44$	M1	
			A1	allow £ 2217.43
	(b)	$0.06 = \left(1 + \frac{i}{12}\right)^{12} - 1$ $1.06 = \left(1 + \frac{i}{12}\right)^{12}$ $1.06^{\frac{1}{12}} = 1 + \frac{i}{12}$ $\frac{i}{12} = 0.0048676 \times 12$ $i = 0.05841$ $i = 5.84\%$	M1	
			B1	B1 for any sight of $1.06^{\frac{1}{12}}$
			M1	for attempt to isolate i
			A1	B1, M1 may be gained for algebraic rearrangement
		TOTAL	6	

⑥

7)	(a)(i)	$4.4 \times \frac{35}{100}$ 1.54 million	M1	
			A1	2
				oe. Ignore change of form if 1.54m o.e. is seen. 1.54 on its own = SC1 2.86m o.e. = SC1 (MR)
	(b)(i)	$443(000) + 273(000) + 167(000)$ $\frac{\text{their } 883(000)}{10297(000)} \times 100$ 8.57	M1	
			M1	
			A1	3
				accept 8.58 or 8.6 or 9

⑤
