

# Specimen A2

## Paper 3: Statistics and Mechanics Mark Scheme

| Question          | Scheme  | Marks      | AOs  |
|-------------------|---|------------|------|
| <b>1(a)</b>       | <b>Area</b> = $8 \times 1.5 = 12 \text{ cm}^2$ <b>Frequency</b> = 8 so $1 \text{ cm}^2 = \frac{2}{3} \text{ hour (o.e.)}$ | M1         | 3.1a |
|                   | Frequency of 12 corresponds to area of 18 so<br><b>height</b> = $18 \div 2.5 = 7.2 \text{ (cm)}$                          | A1         | 1.1b |
|                   | <b>Width</b> = $5 \times 0.5 = 2.5 \text{ (cm)}$  | B1cao      | 1.1b |
|                   |   | <b>(3)</b> |      |
| <b>(b)</b>        | $[\bar{y} =] \frac{205.5}{31} = \text{awrt } 6.63$  | B1cao      | 1.1b |
|                   | $[\sigma_y =] \sqrt{\frac{1785.25}{31} - \bar{y}^2} = \sqrt{13.644641} = \text{awrt } 3.69$                               | M1         | 1.1a |
|                   | allow $[s =] \sqrt{\frac{1785.25 - 31\bar{y}^2}{30}} = \text{awrt } 3.75$   | A1         | 1.1b |
|                   |   | <b>(3)</b> |      |
| <b>(c)</b>        | Mean of Heathrow is higher than Hurn and standard deviation smaller suggesting Heathrow is more reliable                  | M1         | 2.4  |
|                   | Hurn is South of Heathrow so does <u>not</u> support his belief   | A1         | 2.2b |
|                   |   | <b>(2)</b> |      |
| <b>(d)</b>        | $\bar{x} + \sigma \approx 10.3$ so number of days is e.g. $\frac{(11 - "10.3")}{3} \times 8 (+5)$                         | M1         | 1.1b |
|                   | = 6.86 so <b>7 days</b>   | A1         | 1.1b |
|                   |   | <b>(2)</b> |      |
| <b>(e)</b>        | $[H = \text{no. of hours}] \quad P(H > 10.3) \text{ or } P(Z > 1) = [0.15865\dots]$                                       | M1         | 3.4  |
|                   | Predict $31 \times 0.15865\dots = \underline{\underline{4.9 \text{ or } 5 \text{ days}}}$                                 | A1         | 1.1b |
|                   |   | <b>(2)</b> |      |
| <b>(f)</b>        | (5 or ) 4.9 days < (7 or ) 6.9 days so model may <b>not</b> be suitable   | B1         | 3.5a |
|                   |   | <b>(1)</b> |      |
| <b>(13 marks)</b> |   |            |      |

| Question 1 continued |   |
|----------------------|---|
| <b>Notes:</b>        |   |
| (a)                  | <b>M1:</b> for clear attempt to relate the area to frequency. Can also award if their height $\times$ their width = 18<br><b>A1:</b> for height = 7.2 (cm)          |
| (b)                  | <b>M1:</b> for a correct expression for $\sigma$ or $s$ , can ft their value for mean<br><b>A1:</b> awrt 3.69 (allow $s = 3.75$ )                                   |
| (c)                  | <b>M1:</b> for a suitable comparison of standard deviations to comment on reliability.<br><b>A1:</b> for stating Hurn is south of Heathrow and a correct conclusion |
| (d)                  | <b>M1:</b> for a correct expression – ft their $\bar{x} + \sigma \approx 10.3$<br><b>A1:</b> for 7 days but accept 6 (rounding down) following a correct expression |
| (e)                  | <b>M1:</b> for a correct probability attempted<br><b>A1:</b> for a correct prediction   |
| (f)                  | <b>B1:</b> for a suitable comparison and a compatible conclusion  |

| Question      | Scheme  | Marks | AOs              |
|---------------|---|-------|------------------|
| <b>2(a)</b>   | e.g. It requires extrapolation so will be unreliable (o.e.)   | B1    | 1.2              |
|               |   | (1)   |                  |
| <b>(b)</b>    | e.g. Linear association between $w$ and $t$   | B1    | 1.2              |
|               |   | (1)   |                  |
| <b>(c)</b>    | $H_0: \rho = 0$ $H_1: \rho > 0$   | B1    | 2.5              |
|               | Critical value 0.5822   | M1    | 1.1a             |
|               | Reject $H_0$  |       |                  |
|               | There is evidence that the product moment correlation coefficient is greater than 0   | A1    | 2.2b             |
|               |   | (3)   |                  |
| <b>(d)</b>    | Higher $\bar{t}$ suggests overseas and not Perth...lower wind speed so perhaps not close to the sea so suggest <b>Beijing</b> | B1    | 2.4              |
|               |   | (1)   |                  |
|               |   |       | <b>(6 marks)</b> |
| <b>Notes:</b> |   |       |                  |
| <b>(a)</b>    | <b>B1:</b> for a correct statement (unreliable) with a suitable reason  |       |                  |
| <b>(b)</b>    | <b>B1:</b> for a correct statement  |       |                  |
| <b>(c)</b>    | <b>B1:</b> for both hypotheses in terms of $\rho$   |       |                  |
|               | <b>M1:</b> for selecting a suitable 5% critical value compatible with their $H_1$   |       |                  |
|               | <b>A1:</b> for a correct conclusion stated  |       |                  |
| <b>(d)</b>    | <b>B1:</b> for suggesting Beijing with some supporting reason based on $t$ or $w$   |       |                  |
|               | Allow Jacksonville with a reason based just on higher $\bar{t}$   |       |                  |

| Question          | Scheme   | Marks      | AOs  |
|-------------------|--|------------|------|
| <b>Q3(a)</b>      |                 |            |      |
|                   | $P(L > 50.98) = 0.025$   | B1cao      | 3.4  |
|                   | $\therefore \frac{50.98 - \mu}{0.5} = 1.96$  | M1         | 1.1b |
|                   | $\therefore \mu = 50$  | A1cao      | 1.1b |
|                   | $P(49 < L < 50.75)$  | M1         | 3.4  |
|                   | $= 0.9104\dots$ awrt <b>0.910</b>  | A1ft       | 1.1b |
|                   |  | <b>(5)</b> |      |
| <b>(b)</b>        | $S =$ number of strips that cannot be used so $S \sim B(10, 0.090)$                              | M1         | 3.3  |
|                   | $= P(S \leq 3) = 0.991166\dots$ awrt 0.991   | A1         | 1.1b |
|                   |  | <b>(2)</b> |      |
| <b>(c)</b>        | $H_0 : \mu = 50.1$ $H_1 : \mu > 50.1$  | B1         | 2.5  |
|                   | $\bar{X} \sim N\left(50.1, \frac{0.6^2}{15}\right)$ and $\bar{X} > 50.4$                         | M1         | 3.3  |
|                   | $P(\bar{X} > 50.4) = 0.0264$   | A1         | 3.4  |
|                   | $p = 0.0264 > 0.01$ <u>or</u> $z = 1.936\dots < 2.3263$ and not significant                      | A1         | 1.1b |
|                   | There is insufficient evidence that the <b>mean length</b> of strips is <b>greater than 50.1</b> | A1         | 2.2b |
|                   |  | <b>(5)</b> |      |
| <b>(12 marks)</b> |  |            |      |

**Question 3 continued****Notes:****(a)****1<sup>st</sup> M1:** for standardizing with  $\mu$  and 0.5 and setting equal to a  $z$  value ( $|z| > 1$ )**2<sup>nd</sup> M1:** for attempting the correct probability for strips that can be used**2<sup>nd</sup> A1ft:** awrt 0.910 (allow ft of their  $\mu$ )**(b)****M1:** for identifying a suitable binomial distribution**A1:** awrt 0.991 (from calculator)**(c)****B1:** hypotheses stated correctly**M1:** for selecting a correct model (stated or implied)**1<sup>st</sup> A1:** for use of the correct model to find  $p =$  awrt 0.0264 (allow  $z =$  awrt 1.94)**2<sup>nd</sup> A1:** for a correct calculation, comparison and correct statement**3<sup>rd</sup> A1:** for a correct conclusion in context mentioning “mean length” and 50.1

| Question          | Scheme  | Marks | AOs  |
|-------------------|---|-------|------|
| 4(a)              | $P(A'   B') = \frac{P(A' \cap B')}{P(B')} \text{ or } \frac{0.33}{0.55}$  | M1    | 3.1a |
|                   | $= \frac{3}{5} \text{ or } 0.6$   | A1    | 1.1b |
|                   |   | (2)   |      |
| (b)               | e.g. $P(A) \times P(B) = \frac{7}{20} \times \frac{9}{20} = \frac{63}{400} \neq P(A \cap B) = 0.13 = \frac{52}{400}$<br>or $P(A'   B') = 0.6 \neq P(A') = 0.65$   | B1    | 2.4  |
|                   |   | (1)   |      |
| (c)               |   | B1    | 2.5  |
|                   |   | M1    | 3.1a |
|                   |   | A1    | 1.1b |
|                   |   | M1    | 1.1b |
|                   |   | A1    | 1.1b |
|                   | (5)   |       |      |
| (d)               | $P(B \cup C)' = 0.22 + 0.22 \text{ or } 1 - [0.56]$<br>or $1 - [0.13 + 0.23 + 0.09 + 0.11]$ o.e.  | M1    | 1.1b |
|                   | $= 0.44$  | A1    | 1.1b |
|                   |   | (2)   |      |
| <b>(10 marks)</b> |   |       |      |
| <b>Notes:</b>     |   |       |      |
| (a)               | <b>M1:</b> for a correct ratio of probabilities formula and at least one correct value.<br><b>A1:</b> a correct answer  |       |      |
| (b)               | for a fully correct explanation: correct probabilities and correct comparisons.   |       |      |
| (c)               | <b>B1:</b> for box with $B$ intersecting $A$ and $C$ but $C$ not intersecting $A$ . (Or accept three intersecting circles, but with zeros entered for $A \cap C$ and $A \cap B \cap C$ ) No box is B0<br><b>M1:</b> for method for finding $P(B \cap C)$<br><b>A1:</b> for 0.09<br><b>M1:</b> for 0.13 and their 0.09 in correct places and method for their 0.23<br><b>A1:</b> fully correct |       |      |
| (d)               | <b>M1:</b> for a correct expression – ft their probabilities from their Venn diagram.<br><b>A1:</b> cao   |       |      |

| Question      | Scheme  | Marks | AOs              |
|---------------|---|-------|------------------|
| 5 (a)         | The seeds would be destroyed in the process so they would have none to sell   | B1    | 2.4              |
|               |   | (1)   |                  |
| (b)           | $[S = \text{no. of seeds out of 24 that germinate, } S \sim B(24, 0.55)]$   |       |                  |
|               | $T = \text{no. of trays with at least 15 germinating. } T \sim B(10, p)$  | M1    | 3.3              |
|               | $p = P(S \geq 15) = 0.299126\dots$  | A1    | 1.1b             |
|               | So $P(T \geq 5) = 0.1487\dots$ awrt <b>0.149</b>  | A1    | 1.1b             |
|               |   | (3)   |                  |
| (c)           | $n$ is large and $p$ close to 0.5   | B1    | 1.2              |
|               |   | (1)   |                  |
| (d)           | $X \sim N(132, 59.4)$   | B1    | 3.4              |
|               | $P(X \geq 149.5) = P\left(Z \geq \frac{149.5 - 132}{\sqrt{59.4}}\right)$  | M1    | 1.1b             |
|               | $= 0.01158\dots$ awrt <b>0.0116</b>   | A1cso | 1.1b             |
|               |   | (3)   |                  |
| (e)           | e.g The probability is very small therefore there is evidence that the company's claim is incorrect.  | B1    | 2.2b             |
|               |   | (1)   |                  |
|               |   |       | <b>(9 marks)</b> |
| <b>Notes:</b> |   |       |                  |
| (a)           | <b>B1:</b> cao  |       |                  |
| (b)           | <b>M1:</b> for selection of an appropriate model for $T$<br><b>1<sup>st</sup> A1:</b> for a correct value of the parameter $p$ (accept 0.3 or better)<br><b>2<sup>nd</sup> A1:</b> for awrt 0.149 |       |                  |
| (c)           | <b>B1:</b> both correct conditions  |       |                  |
| (d)           | <b>B1:</b> for correct normal distribution<br><b>M1:</b> for correct use of continuity correction<br><b>A1:</b> cso   |       |                  |
| (e)           | <b>B1:</b> correct statement  |       |                  |

| Question  | Scheme   | Marks | AOs              |
|---|--|-------|------------------|
| 6   | Integrate <b>a</b> w.r.t. time   | M1    | 1.1a             |
|   | $\mathbf{v} = \frac{5t^2}{2}\mathbf{i} - 10t^{\frac{3}{2}}\mathbf{j} + \mathbf{C}$ (allow omission of <b>C</b> ) | A1    | 1.1b             |
|   | $\mathbf{v} = \frac{5t^2}{2}\mathbf{i} - 10t^{\frac{3}{2}}\mathbf{j} + 20\mathbf{i}$                             | A1    | 1.1b             |
|   | When $t = 4$ , $\mathbf{v} = 60\mathbf{i} - 80\mathbf{j}$  | M1    | 1.1b             |
|   | Attempt to find magnitude: $\sqrt{(60^2 + 80^2)}$  | M1    | 3.1a             |
|   | Speed = 100 m s <sup>-1</sup>  | A1ft  | 1.1b             |
|   |  |       | <b>(6 marks)</b> |
| <b>Notes:</b>   |  |       |                  |
| 1 <sup>st</sup> <b>M1</b> : for integrating <b>a</b> w.r.t. time (powers of $t$ increasing by 1)          |  |       |                  |
| 1 <sup>st</sup> <b>A1</b> : for a correct <b>v</b> expression without <b>C</b>                            |  |       |                  |
| 2 <sup>nd</sup> <b>A1</b> : for a correct <b>v</b> expression including <b>C</b>                          |  |       |                  |
| 2 <sup>nd</sup> <b>M1</b> : for putting $t = 4$ into their <b>v</b> expression                            |  |       |                  |
| 3 <sup>rd</sup> <b>M1</b> : for finding magnitude of their <b>v</b>                                       |  |       |                  |
| 3 <sup>rd</sup> <b>A1</b> : <b>ft</b> for 100 m s <sup>-1</sup> , follow through on an incorrect <b>v</b> |  |       |                  |

| Question   | Scheme  | Marks      | AOs              |
|--|---|------------|------------------|
| 7(a)   | $R = mg\cos\alpha$                                    | B1         | 3.1b             |
|  | Resolve parallel to the plane                         | M1         | 3.1b             |
|  | $-F - mg\sin\alpha = -0.8mg$                          | A1         | 1.1b             |
|  | $F = \mu R$   | M1         | 1.2              |
|  | Produce an equation in $\mu$ only and solve for $\mu$ | M1         | 2.2a             |
|  | $\mu = \frac{1}{4}$                                   | A1         | 1.1b             |

| Question  | Scheme   | Marks | AOs  |
|---|--|-------|------|
| <b>8(a)</b>   | Use of $\mathbf{v} = \mathbf{u} + \mathbf{a}t$ : $(10.5\mathbf{i} - 0.9\mathbf{j}) = 0.6\mathbf{j} + 15\mathbf{a}$ | M1    | 3.1b |
|   | $\mathbf{a} = (0.7\mathbf{i} - 0.1\mathbf{j}) \text{ m s}^{-2}$ Given answer                                       | A1    | 1.1b |
|   |  | (2)   |      |
| <b>(b)</b>  | Use of $\mathbf{r} = \mathbf{u}t + \frac{1}{2} \mathbf{a}t^2$  | M1    | 3.1b |
|   | $\mathbf{r} = 0.6\mathbf{j}t + \frac{1}{2}(0.7\mathbf{i} - 0.1\mathbf{j})t^2$                                      | A1    | 1.1b |
|   |  | (2)   |      |
| <b>(c)</b>  | Equating the <b>i</b> and <b>j</b> components of <b>r</b>  | M1    | 3.1b |
|   | $\frac{1}{2} \leftarrow 0.7t^2 = 0.6t - \frac{1}{2} \leftarrow 0.1t^2$   | A1ft  | 1.1b |
|   | $t = 1.5$  | A1    | 1.1b |
|   |  | (3)   |      |
| <b>(d)</b>  | Use of $\mathbf{v} = \mathbf{u} + \mathbf{a}t$ : $\mathbf{v} = 0.6\mathbf{j} + (0.7\mathbf{i} - 0.1\mathbf{j})t$   | M1    | 3.1b |
|   | Equating the <b>i</b> and <b>j</b> components of <b>v</b>  | M1    | 3.1b |
|   | $t = 0.75$   | A1 ft | 1.1b |
|   |  | (3)   |      |
| <b>(10 marks)</b>   |  |       |      |
| <b>Notes:</b>   |  |       |      |
| <b>(a)</b>  |  |       |      |
| <b>M1:</b> for use of $\mathbf{v} = \mathbf{u} + \mathbf{a}t$                               |  |       |      |
| <b>A1:</b> for given answer correctly obtained  |  |       |      |
| <b>(b)</b>  |  |       |      |
| <b>M1:</b> for use of $\mathbf{r} = \mathbf{u}t + \frac{1}{2} \mathbf{a}t^2$                |  |       |      |
| <b>A1:</b> for a correct expression for <b>r</b> in terms of <i>t</i>                       |  |       |      |
| <b>(c)</b>  |  |       |      |
| <b>M1:</b> for equating the <b>i</b> and <b>j</b> components of their <b>r</b>              |  |       |      |
| <b>A1ft:</b> for a correct equation following their <b>r</b>                                |  |       |      |
| <b>A1:</b> for $t = 1.5$  |  |       |      |
| <b>(d)</b>  |  |       |      |
| <b>M1:</b> for use of $\mathbf{v} = \mathbf{u} + \mathbf{a}t$ for a general <i>t</i>        |  |       |      |
| <b>M1:</b> for equating the <b>i</b> and <b>j</b> components of their <b>v</b>              |  |       |      |
| <b>A1ft:</b> for $t = 0.75$ , or a correct follow through answer from an incorrect equation |  |       |      |

| Question    | Scheme  | Marks      | AOs               |
|-------------|---|------------|-------------------|
| <b>9(a)</b> | Take moments about $A$<br>(or any other complete method to<br>produce an equation in $S$ , $W$ and $\alpha$ only) | M1         | 3.3               |
|             | $W \cos \alpha + 7W \cos \alpha = S \sin \alpha$  | A1<br>A1   | 1.1b<br>1.1b      |
|             | Use of $\tan \alpha = \frac{5}{2}$ to obtain $S$  | M1         | 2.1               |
|             | $S = 3W$ *  | A1*        | 2.2a              |
|             |   | <b>(5)</b> |                   |
| <b>(b)</b>  | $R = 8W$  | B1         | 3.4               |
|             | $F = \frac{1}{4} R (= 2W)$  | M1         | 3.4               |
|             | $P_{\text{MAX}} = 3W + F$ or $P_{\text{MIN}} = 3W - F$  | M1         | 3.4               |
|             | $P_{\text{MAX}} = 5W$ or $P_{\text{MIN}} = W$   | A1         | 1.1b              |
|             | $W \leq P \leq 5W$  | A1         | 2.5               |
|             |   | <b>(5)</b> |                   |
| <b>(c)</b>  | M(A) shows that the reaction on the ladder at $B$ is<br>unchanged   | M1         | 2.4               |
|             | also $R$ increases (resolving vertically)   | M1         | 2.4               |
|             | which increases max $F$ available   | M1         | 2.4               |
|             |   | <b>(3)</b> |                   |
|             |   |            | <b>(13 marks)</b> |

**Question 9 continued****Notes:****(a)****1<sup>st</sup> M1:** for producing an equation in  $S$ ,  $W$  and  $\alpha$  only**1<sup>st</sup> A1:** for an equation that is correct, or which has one error or omission**2<sup>nd</sup> A1:** for a fully correct equation**2<sup>nd</sup> M1:** for use of  $\tan \alpha = \frac{S}{2}$  to obtain  $S$  in terms of  $W$  only**3<sup>rd</sup> A1\*:** for given answer  $S = 3W$  correctly obtained**(b)****B1:** for  $R = 8W$ **1<sup>st</sup> M1:** for use of  $F = \frac{1}{4} R$ **2<sup>nd</sup> M1:** for either  $P = (3W + \text{their } F)$  or  $P = (3W - \text{their } F)$ **1<sup>st</sup> A1:** for a correct max or min value for a correct range for  $P$ **2<sup>nd</sup> A1:** for a correct range for  $P$ **(c)****1<sup>st</sup> M1:** for showing, by taking moments about  $A$ , that the reaction at  $B$  is unchanged by the builder's assistant standing on the bottom of the ladder**2<sup>nd</sup> M1:** for showing, by resolving vertically, that  $R$  increases as a result of the builder's assistant standing on the bottom of the ladder**3<sup>rd</sup> M1:** for concluding that this increases the limiting friction at  $A$

| Question     | Scheme  | Marks      | AOs               |
|--------------|---|------------|-------------------|
| <b>10(a)</b> | Using the model and horizontal motion: $s = ut$   | M1         | 3.4               |
|              | $36 = U t \cos \alpha$  | A1         | 1.1b              |
|              | Using the model and vertical motion: $s = ut + \frac{1}{2} at^2$  | M1         | 3.4               |
|              | $-18 = U t \sin \alpha - \frac{1}{2} g t^2$   | A1         | 1.1b              |
|              | Correct strategy for solving the problem by setting up two equations in $t$ and $U$ and solving for $U$   | M1         | 3.1b              |
|              | $U = 15$  | A1         | 1.1b              |
|              | <b>(6)</b>  |            |                   |
| <b>(b)</b>   | Using the model and horizontal motion: $U \cos \alpha$ (12)   | B1         | 3.4               |
|              | Using the model and vertical motion:<br>$v^2 = (U \sin \alpha)^2 + 2(-10)(-7.2)$  | M1         | 3.4               |
|              | $v = 15$  | A1         | 1.1b              |
|              | Correct strategy for solving the problem by finding the horizontal and vertical components of velocity and combining using Pythagoras: Speed = $\sqrt{(12^2 + 15^2)}$ | M1         | 3.1b              |
|              | $\sqrt{369} = 19 \text{ m s}^{-1}$ (2sf)  | A1 ft      | 1.1b              |
|              |   | <b>(5)</b> |                   |
| <b>(c)</b>   | Possible improvement (see below in notes)   | B1         | 3.5c              |
|              | Possible improvement (see below in notes)   | B1         | 3.5c              |
|              |   | <b>(2)</b> |                   |
|              |   |            | <b>(13 marks)</b> |

**Question 10 continued****Notes:****(a)****1<sup>st</sup> M1:** for use of  $s = ut$  horizontally**1<sup>st</sup> A1:** for a correct equation**2<sup>nd</sup> M1:** for use of  $s = ut + \frac{1}{2}at^2$  vertically**2<sup>nd</sup> A1:** for a correct equation**3<sup>rd</sup> M1:** for correct strategy (need both equations)**2<sup>nd</sup> A1:** for  $U = 15$ **(b)****B1:** for  $U\cos\alpha$  used as horizontal velocity component**1<sup>st</sup> M1:** for attempt to find vertical component**1<sup>st</sup> A1:** for 15**2<sup>nd</sup> M1:** for correct strategy (need both components)**2<sup>nd</sup> A1ft:** for  $19 \text{ m s}^{-1}$  (2sf) following through on incorrect component(s)**(c)****B1, B1:** for any two of

e.g. Include air resistance in the model of the motion

e.g. Use a more accurate value for  $g$  in the model of the motion

e.g. Include wind effects in the model of the motion

e.g. Include the dimensions of the stone in the model of the motion
