

Godalming Online – Obviously there is the ‘Tests and Exam papers’ bit that has the papers and (mostly) mark schemes.

The ‘Resource’ section is pretty useful too....it has PowerPoints from Dr.Frost and the ‘old’ modular exam past paper questions by topic.

Resources

Just look around and see what you like the look of!

You’ve also got all the homework’s (and mark schemes) if you’ve ever missed a section 1 or section 3, there might be something helpful in those to do?

Also, as and when we find new resources, possibly while you are on study leave, this is where we would likely put them.

Active learn textbooks – Use the mixed exercise in the text book

www.mathsgenie.co.uk

There are questions by topic and video demonstrations on here too

www.Crashmaths.com

There are tonnes of practice papers here, as well as some good stuff on the Large Data set. The ‘worksheets’ and ‘teaching resources’ sections are good (although still in development)

crash**MATHS**

AS/A Level GCE

A Level Maths & Further Maths

www.MadasMaths.com

Loads of fab practice papers on here, just watch out as some are still being created as we speak! Also some topic based worksheets.

MadAsMaths

There is always good old You Tube and Google if you need to search for a particular question

PHYSICS & MATHS TUTOR

www.physicsandmathstutor.com – has questions by topic, it is a bit tricky to navigate but if you are desperate, it might be helpful!

Keep referring back to the original TOPIC overview list to see what you need to improve on

www.integrationcalculator.com – Good to check an integration if you are stuck as it will give you the steps
