**Unit 3: Problem Solving, Programming,
Operating Systems, Databases and Networking**

Final

Mark Scheme

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all examiners participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for standardisation each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, examiners encounter unusual answers which have not been raised they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available from: aqa.org.uk

Copyright

AQA retains the copyright on all its publications. However, registered centres for AQA are permitted to copy material from this booklet for their own internal use, with the following important exception: AQA cannot give permission to centres to photocopy any material that is acknowledged to a third party even for internal use within the centre.

Set and published by the Assessment and Qualifications Alliance.

The following annotation is used in the mark scheme:

- ;** - means a single mark
- //** - means alternative response
- /** - means an alternative word or sub-phrase
- A** - means acceptable creditworthy answer
- R** - means reject answer as not creditworthy
- NE** - means not enough
- I** - means ignore
- DPT** - in some questions a specific error made by a candidate, if repeated, could result in the loss of more than one mark. The **DPT** label indicates that this mistake should only result in a candidate losing one mark, on the first occasion that the error is made. Provided that the answer remains understandable, subsequent marks should be awarded as if the error was not being repeated.

Virus	Malicious self-replicating programs which attach to other programs																					
Spam	Unsolicited junk email																					
Worm	Malicious self-replicating programs which replicate across networks using security vulnerabilities																					
Remote Login	Ability to login to a computer via Internet A "hacking" if explained																					
Trojan	A malicious program hidden inside another program // masquerading as another program																					
Phishing	Attempts to get users to divulge personal information																					
Pharming	Misdirecting users to a fake website by changing DNS entries																					
Spyware	Program that collects information from a user's computer without user knowing																					
Denial of Service Attack	Repeated requests/pings from the Internet could overwhelm (parts of) the network.																					

How to award marks:	
Mark Bands and Description	
5-6	<p><i>To achieve a mark in this band, candidates must meet the subject criterion (SUB) and all 5 of the quality of language criteria (QLx).</i></p> <p>SUB Candidate has described 2 security threats and 3 appropriate measures OR 3 security threats and 2 appropriate measures. To get 6 marks answer must include 3 threats and 3 appropriate measures.</p> <p>QL1 Text is legible.</p> <p>QL2 There are few, if any, errors of spelling, punctuation and grammar. Meaning is clear.</p> <p>QL3 The candidate has selected and used a form and style of writing appropriate to the purpose and has expressed ideas clearly and fluently.</p> <p>QL4 Sentences and paragraphs follow on from one another clearly and coherently.</p> <p>QL5 Appropriate specialist vocabulary has been used.</p>
3-4	<p><i>To achieve a mark in this band, candidates must meet the subject criterion (SUB) and 4 of the 5 quality of language criteria (QLx).</i></p> <p>SUB Candidate has described at least 2 security threats and described 1 or more appropriate security measures OR candidate has named (but not described) some security threats and has described 3 or more security measures</p> <p>QL1 Text is legible.</p> <p>QL2 There may be occasional errors of spelling, punctuation and grammar. Meaning is clear.</p> <p>QL3 The candidate has, in the main, used a form and style of writing appropriate to the purpose, with occasional lapses. The candidate has expressed ideas clearly and reasonably fluently.</p> <p>QL4 The candidate has used well-linked sentences and paragraphs.</p> <p>QL5 Appropriate specialist vocabulary has been used.</p>
1-2	<p><i>To achieve a mark in this band, candidates must meet the subject criterion (SUB). The quality of language should be typified by the QLx statements.</i></p> <p>SUB Candidate has described at least 1 security threat and may or may not have described some appropriate security measures OR candidate has named at least one security threat and has described 1 or 2 security measures.</p> <p>QL1 Most of the text is legible.</p> <p>QL2 There may be some errors of spelling, punctuation and grammar but it should still be possible to understand most of the response.</p> <p>QL3 The candidate has used a form and style of writing which has many deficiencies. Ideas are not always clearly expressed.</p> <p>QL4 Sentences and paragraphs may not always be well-connected or bullet points may have been used.</p> <p>QL5 Specialist vocabulary has been used inappropriately or not at all.</p>
0	Candidate has made no relevant points.
<p>Note: Even if English is perfect, candidates can only get marks for the</p>	

			points made at the top of the mark scheme for this question. If a candidate meets the subject criterion in a band but does not meet the quality of language criteria then drop mark by one band, providing that at least 3 of the quality of language criteria are met in the lower band. If 3 criteria are not met then drop by two bands.	6
--	--	--	--	----------

9	(a)	(i)	One or more a's followed by (a/one) b; A answers by example but must be at least ab, aab, aaab and show that the sequence continues.	1
9	(a)	(ii)	The strings ab or b // zero or one a's followed by (a/one) b	1
9	(a)	(iii)	A sequence of 0 or more occurrences of ab. A answers by example but must be at least the empty string, ab, abab, ababab and show that the sequence continues.	1
9	(b)	(i)	Clai?re // Clare Claire A other valid possibilities e.g. Cla(ir r)e, Cl(air ar)e A use of different types of brackets	1
9	(b)	(ii)	10(0 1)*01 1 mark for the 10 at the start and 01 at the end 1 mark for (0 1)* in the middle to produce a correct expression A use of different types of brackets Award 2 marks for any other expression that would work	2

10	(a)		Number of signal changes per second // rate at which signals can change; A voltage changes for signal changes as BOD	1								
10	(b)	(i)	Each signal level/signal change represents two bits (of data)/more than one bit (of data) // channel supports four/more than two different signal levels/voltages // use of modulation/coding technique e.g. phase modulation NE Send more than one bit at a time Must be clear that there are more than two signal levels	1								
10	(b)	(ii)	<table border="1"> <thead> <tr> <th>Step</th> <th>Data/Request Sent</th> </tr> </thead> <tbody> <tr> <td>2</td> <td>Printer indicates ready; A Yes, Ack</td> </tr> <tr> <td>3</td> <td>[Computer sends] data;</td> </tr> <tr> <td>6</td> <td>Printer indicates ready to receive further data; R job complete NE data received</td> </tr> </tbody> </table> <p>1 mark per correct step</p>	Step	Data/Request Sent	2	Printer indicates ready; A Yes, Ack	3	[Computer sends] data;	6	Printer indicates ready to receive further data; R job complete NE data received	3
Step	Data/Request Sent											
2	Printer indicates ready; A Yes, Ack											
3	[Computer sends] data;											
6	Printer indicates ready to receive further data; R job complete NE data received											
10	(c)		Baseband – whole bandwidth of medium dedicated to one channel at a time // only one computer can send data at a time // sends signals with frequencies from 0Hz to a maximum highest frequency. Suitable for LAN – lower cost electronic components (accept examples) // simpler hardware // good performance at low cost									

		<p>NE cheaper Broadband – bandwidth of medium shared so multiple channels can be carried simultaneously // many computers can send data simultaneously // frequency bands assigned to different communications. TO multiple wires Suitable for WAN – expensive to install/maintain communications media over long distance // many more devices/people needs to communicate // more cost effective to share medium.</p> <p>How to award marks:</p> <table border="1" data-bbox="469 645 1315 2092"> <thead> <tr> <th colspan="2" data-bbox="469 645 1315 678">Mark Bands and Description</th> </tr> </thead> <tbody> <tr> <td data-bbox="469 678 552 1218">3-4</td> <td data-bbox="552 678 1315 1218"> <p><i>To achieve a mark in this band, candidates must meet the subject criterion (SUB) and 5 of the 5 quality of language criteria (QLx).</i></p> <p>SUB Candidate has described both baseband and broadband and has explained accurately why at least one of these is appropriate to the context.</p> <p>QL1 Text is legible.</p> <p>QL2 There are few, if any, errors of spelling, punctuation and grammar.
