

Welcome to Godalming College Maths Department

We hope you will enjoy your time with us. We are working towards taking the exam in November – that's not long! So in order to gain the maximum benefit from your lessons you need to do some preparation.

The enrolment work is a foundation non-Calculator paper. We want to maximise your chances of reaching that grade 4 and our experience shows that the more past papers you complete, the better your chance of passing.

Please **complete** the GCSE Enrolment work and **bring it to your first lesson**. You should check your answers using the mark scheme on Godalming Online (GO).

You will be sitting the Foundation Tier GCSE in November, we hope you will do your utmost to achieve your grade 4 by then, but should you need another attempt you will also have an opportunity in June.

You should also familiarise yourself with the GCSE Maths page on GO.

In particular:-

- Read the course guide
- Look at the web links. Corbett Maths and Maths Genie are especially useful. They both contain video clips on GCSE material. (The exam board we use for GCSE is Edexcel)

We are a supportive department and run daily drop in sessions every lunchtime. We have a really good success rate with GCSE resit and we hope that you are one of our many successes! We look forward to meeting you again in your first lesson. Make sure you bring your completed GCSE Enrolment work with you.
