Unit 1: Information Technology Systems

	Paper Reference 31760H
--	----------------------------------

You do not need any other materials.	Total Marks
---	-------------

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and learner registration number.
- Answer **all** questions.
- Answer the questions in the spaces provided
 - *there may be more space than you need.*

Information

- The total mark for this paper is 90.
- The marks for **each** question are shown in brackets
 - *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

1/1/1/1

Answer ALL questions. Write your answers in the spaces provided.

1 Anderson is an accountant hired by companies to help with financial tasks.

He works from home and travels around the country visiting clients.

He uses a laptop computer for personal and work-related tasks.

He has confidential information stored on his laptop which includes personal and financial information.

(a) Anderson uses a username and password to restrict access to his laptop.

Describe **one** other method Anderson could use to restrict access to his laptop.

(Total for Question 2 = 21 marks)

- 3 Manuel owns a parcel delivery company that provides a collection and delivery service for businesses and individuals.

Customers can use the company's website to book the collection of a parcel.

- (a) When a customer books the collection of a parcel the website generates a shipping label.

Figure 1 shows part of the shipping label. It contains a QR (Quick Response) code.

Figure 1

The shipping label will be attached to the parcel by the customer.

When the driver collects the parcel they use a multifunctional device to access the information provided by the QR code.

The status of the parcel is then changed to 'collected'.

Customers can use the company's website to track the parcel's location.

Draw a diagram to show how the parcel tracking system works.

The diagram should include:

- devices and systems that could be used
- devices to be connected and the connection type(s) used
- the flow of data through the system
- annotations to show actions taken by customers and drivers
- annotations indicating the information and data to be passed between systems, devices and users.

(b) Shayan's charity provides a number of services including:

- recycling and repurposing old computers
- access to educational materials stored on the charity's server.

Shayan has decided that access to the educational materials will be by use of a Command Line Interface rather than a Graphical User Interface.

Evaluate Shayan's decision to use a Command Line Interface.
