

Setting up a Poll on a GoL page

Example of what a Poll block looks like when someone has voted:

How to set up a Poll:

1. Turn editing on.
2. In the right column of the page in **ADD A BLOCK** add a **Poll**.
3. Click the Poll edit icon and choose **Configure Poll block**.
4. Add a name for the block – it can be something general like **“What do you think?”** set the graph width to **200** and save changes. This block can be used for any number of Polls but only one at a time.
5. Now edit the Poll block again and click **Create/Edit Poll**.
6. Give your Poll a name, add the question and choose how many options. **Save changes**. You also have the option of checking the **Anonymous** check box (see below).
7. Add your options and **save changes** (see below).
8. Now choose the **Configure Block** tab and set the **Poll name** to the poll you have set up and save changes.
9. Your poll is ready to use and will display on the course page. When a student has voted they will be able to see how everyone else has voted so far.
10. You can hide the Poll block when you have finished using it or set up another poll to display in the same block.
